Stonewall

Stonewall, March 8.- Mrs. S. L. Scruggs is on the sick list.

Mrs. B. D. Stratton and children are improving after recent illnesses.

Mrs. O. R. Turnes attended the Quarterly Conference at Mt. Comfort Church last Sunday.

Mr. and Mrs. Ben Wheeler, of Appomattox, were dinner guests of his parents, Mr. and Mrs. Irby Wheeler last Sunday.

Mr. and Mrs. John Wheeler and Mr. and Mrs. Max Wheeler were guests of Mrs. Lee Wheeler Sunday.

Mrs. Anna Lee and Mrs. Lee Wheeler both celebrated their birthdays this week. We wish for these fine ladies many happly returns of the day.

Mr. and Mrs. W. W. Paulette, of Drakes Branch; Mr. and Mrs. Pete Dickerson and son, Fred; Mr. and Mrs. Calvin Collins and Melvin Caldwell, of Lynchburg were guests of Mr. and Mrs. C. M. Caldwell last Sunday.

Mr. and Mrs. Henry Beard and son, Lawrence and Mr. and Mrs. E. L. Chick visited relatives in Lynchburg Sunday afternoon.

Mr. and Mrs. J. C. Beard and children, of Baltimore, Md., spent the week-end with his mother, Mrs. J. C. Beard.

Mr. and Mrs. Tilton Lee and children and Mrs. Anna Lee spent Sunday with Mr. and Mrs. W. G Wheeler, at Rustburg.

Mr. and Mrs. Ken Smith and Miss Anne Carson, of Lynchburg, spent the week-end with Mr. and Mrs. C. D. Carson.

Mrs. Rufus Burnette spent Monday with her mother, Mrs. Anna Lee, it being her birthday. Her sister, Mrs. Lee Wheeler, Mr. and Mrs. Irby Wheeler and Mr. and Mrs. E. L. Chick called that night to wish her a happy birthday.

Nation's Television Sales Topped 975,000 Last Year

WASHINGTON.—Output of television receivers totaled more than 975,000 sets during 1948, bringing total television production since the end of the war to 1,160,000, according to a report issued by the Radio Manufacturers association. An additional 25,000 to 30,000 unassembled television kits were manufactured during the year.

About 44 per cent of the total was manufactured during the last quarter of 1948. In December approximately 39,000 television sets were produced weekly, but production was set back by holiday shutdowns.

Total production of radio sets in 1948 was estimated at more than 16,000,000 sets. However, with many radio manufacturers devoting an increasingly larger share of their production capacity to television, output of radios was about 20 per cent below total production in 1947, which was the second highest in the history of the industry.

Spectacular Exhibition To Be Staged by Britain

The largest and most spectacular exhibition since the New York world fair of 1940 will be held in London in 1951.

Every village and town in Britain is being invited to go gay during the 1951 festival, which will last from May to September. It will tell the story of British life—in work and play, in discovery, invention and design. It will present a coherent and imaginative picture of British achievement—past, present and to come—and of its contributions to the world in science, technology, culture and industrial design.

The central exhibition will be situated on the south bank of the River Thames, across from the Victoria embankment. Here will rise a bright and gaily colored modern city, made of fabric. The concentration of all Britain's building materials in her tremendous housing program which is making homes for people at the rate of 80,000 families a month will make it impossible to build permanent buildings on the 27-acre site.

Dyeing, Ancient Art

Ancient Egypt's sarcophagi of the year 7000 B. C. show exquisite colors, and a garment dyed with indigo dating from 3500 B. C., has been found in Thebes. Thenceforth each of the dominant civilizations of antiquity developed further the use of fabric dyes derived from vegetable and mineral sources. It wasn't until 1856 that dyeing began to be released from its dependency upon vegetable and mineral sources. In that year, an English student, named William Henry Perkin, discovered that aniline derived from coal tar could be chemically treated to produce beautiful and lasting colors. But progress in the development of chemical dyes has been most pronounced and rapid during the past quarter of a century.

Shakespeare Wrote Verse To Help Guard Remains

Historians have discovered that the four lines carved on Shakespeare's tomb are a warning—and not an epitaph.

G. E. Bentley, well-known Shakespearian historian at Princeton university, explains in an article written for the new World Book encyclopedia that the verse is another example of Shakespeare's rare insight into the customs of his day.

The author relates that Shakespeare is buried in the chancel of Holy Trinity church. In English churches, people were buried under the floor of the church, year after year, for centuries, and space began to be a problem. When all the available burial facilities were exhausted, the sexton removed the remains of those who had been forgotten and tossed them unceremoniously into the carnal house, where dead bodies and bones were kept.

When Shakespeare selected his final resting place, he noted that the opening for the carnal house was only a few feet from his future grave.

Relying on the superstition of the sexton—and having a firm desire to rest in peace—Shakespeare requested a verse be placed on a flat stone over his grave. In modern English it reads:

Good Friend For, Jesus Sake Forbear,
To Dig The Dust Enclosed Here;
Blessed Be That Man Who Spares These Stones,
And Cursed Be He Who Moves My Bones.

Australian Urges Flight 'Round South Pole in 1950

PERTH, AUSTRALIA. — Charles K. Foot, West Australian, is trying to promote a round-the-South-Pole flight next year.

He thinks such a flight should be made early in the year to mark the visit of King George VI, Queen Elizabeth and Princess Margaret.

Foot says such a flight would strengthen Australia's claim to part of the Antarctic continent and add to scientific knowledge of the old south. He suggests that the flight be made by flying boat and start and end at Perth.

From this west Australian city, he says, the plane could fly to Hobart, Tasmania. Then it would head south, refuelling at Macquarie island at a rendezvous with a ship in the Ross sea and then at Palmer Archipelago.

It would make the next stop at Magallenes, the Chilean city at the southern tip of South America. From there the plane would fly to Cape Town, South Africa, stopping on the way at a permanent whaling station at South Georgia in the South Atlantic. Then it would fly to Prince Edward and Heard islands before completing the round-the-world flight at Perth.

Bethany

Bethany, March 9.- Mr. and Mrs. James K. Paulette, of Lynchburg, visited Mr. and Mrs. P. O. Paulette and Mr. and Mrs. Curtis Paulette Sunday afternoon.

Mr. and Mrs. Wylie Richardson and sons, Mr. and Mrs. Bill Dudley and Mrs. Garland Mayberry, of Lynchburg visited Mr. and Mrs. Mott Harvey over the week-end.

Phyllis Harvey, of Evergreen, spent Sunday with Hazel and 'Red' Paulette.

Mr. and Mrs. David Paulette and daughter visited Mrs. Penick Harvey Sunday evening. She also visited Walter Paulette in the home of his son, Russell Paulette.

Jerry Paulette, of Richmond and Gene Paulette spent the week-end in the home of Mr. and Mrs. Paulette.

Mr. and Mrs. Jimmie [illegible] Lynchburg visited Mr. and Mrs. Paulette over the week-end.

Mrs. Edd Moore, of Madison spent Thursday with Mr. and Phil Paulette.

Mrs. Ada Paulette is a patient the Virginia Baptist Hospital.

Mr. and Mrs. Fred Martin and Mr. and Mrs. Joe Paulette visited Walter Paulette Sunday.

Woman's World

Restyling Helps Add Interest When You Grow Tired of Clothes

By Ertta Haley

ABOUT THIS TIME of year, almost every woman can hardly wait for the new season's clothes to come out, and at the same time she has tired of clothes she's been wearing since last fall.

The answer to this problem is some simple restyling on clothes of which you have tired. Restyling does not involve any such extensive job as remaking a dress or hat completely. It simply means that you add some new touches to the clothing that you have to wear for a few months longer.

A new set of collars and cuffs, a bit of hem interest, a new set of buttons, a fresh yoke or plastron on a dress are refreshing and will add new life and interest to many garments.

Or, change the cuffs on a pair of fabric gloves by adding a dash of color. For a piece of fine veiling on a hat, substitute a piece of coarse-ly textured material and see how delighted you will be.

Dramatic buttons on a weary suit guarantee new interest. Some clip-on jewelry for your hand bag makes it almost new! These are all simple restyling tricks, but they will lift any wardrobe out of the doldrums until you can don lighter, gayer things of the new season.

To Cleaning, Repairs Before Restyling

You will be both surprised and delighted at how much life you can bring to clothing with proper cleaning. Much of the original texture and shape of the garment can be restored to dresses, sweaters, hats and coats when dirt and grime are displaced. Wash those pieces which are guaranteed washable, and clean or have cleaned those which require it.

Repair buttons, snaps, zippers and other parts of the garment which need it. If the garment still same material to hold the dress together.

Hem interest is still high, and a ruffled or gathered hem may be added to a full, flaring skirt, or a softly gathered one. If you are working with the skirt alone, and adding restyling in the form of a new hem to it, carry out the same motif in the pockets, too.

If you're adding the hem to a dress, it's wise to make a collar and cuffs of the same material as the hem. This forestalls an appearance of face-lifting, and makes the garment look as though just purchased.

In cases where you have gained or lost weight during the season, the restyling will consist of letting out or taking in a garment. The latter is an easy matter; the former slightly more difficult since material may have to be added.

For the too tight basic dress, add an inverted panel of trimming and use the same trim on the cuffs. For dresses that have become shorter because you've gained weight, a new hem plus collar and cuffs may be added.

How to Restyle Torn Blouses

There's a lot of under-arm strain on blouses resulting in tears beyond repair. For the short-sleeved blouse which has torn, full, new sleeves may be added.

For sleeves which have torn at the armhole, it's best to cut down the blouse and make a dickey out of it.

For lace which is frayed and shabby at the front of the blouse, carefully rip out the old, and insert some new lace which will match closely that which has been removed.

Blouses which button down the back, frequently tear at the button holes, or where the buttons are sewed. This is easily mended by placing a long strip of matching mending tape on either side, preferably on the button side. Place the tape inside where the fabric will cover it and then sew the buttons on that. It means a good reinforcing job.

Change Your Shabby Accessories

It's a simple matter to buy a new belt or change a tarnished buckle on the old one in prefernce to wearing a shabby one. Besides that, a fresh new belt or a reconditioned one will do more for both waistline and dress.

Clasps, zippers and trimmings on purses can be changed either by yourself or a repair shop. If a favorite hand-bag has a worn lining, it's easy enough to mend it or buy a new piece of fabric to make a fresh one.

Suede and leather cleaners may be used on gloves to good advantage. A stiff-bristled brush used on a suede bag will bring new life to it.

Try a brisk brushing, too, on a felt or suede hat and see how well the nap comes up in it. Many hats need nothing more to restore them than thorough brushing which will rid them of several month's accumulation of dust that dulls their color.

For hats which have been caught too frequently in rain and snow, do or have done, a re-blocking job. With a change of velling in addition to this, hats will become practically new.

Empire Waistline

Fashion interest centers on the softly shirred empire waistline and the matching three-quarter sleeves in this wool crepe dress designed by Sara Simon. Other good points include the standing up collar, the deep V-neckline and the corded self belt.

Add a new yoke . . . it does not create more of an interest, embark on a bit of restyling.

Buy or Make Your Patterns

Yokes, plastrons, collars and cuffs as well as puffy peplums which are now being used may be cut from tissue paper at home, or purchased if you don't feel clever about designing them.

Check your own sources of materials before purchasing any. A bit of precious lace from an old dress or trimming may give you a new

Or ruffle to restyle dress.

yoke for a dress or collars and cuffs. It's possible to sew imitation rhinestones into the lace to add glitter and new life to the lace.

Old evening apparel often yields a piece of taffeta or net that can be utilized into yokes, collars or cuffs.

The new tissue taffeta may be purchased by the yard to add a plastron to the front of a dress. Almost any type of material can be used to add a portrait ruffle neckline to a dress. Make a belt of the

Be Smart!

Come what may in hat fashions there's always at least one small hat that you'll cling to for all sorts of occasions. This season it's likely to be a pretty beret. Not just any beret will do, for it must be a very smart one such as the jade genius highlighted with brown mesh as shown in the sketch. It's fastened underneath a young chin with a soutache frog.

Teen-agers Use Picks, Shovels Helping Get Play Field Ready

CRANFORD, N. J. — Teen-age pupils worked with pick and shovel on topsoil supplied by local townspeople in a community-sponsored effort to build a recreation field for Cranford high school. Folks here are proud of the project, which has been a cooperative enterprise from its inception.

Boys and girls in mathematics classes did the preliminary surveys on the block-long lawn behind the school set aside as the play area. Industrial arts students have got some practical training hoeing and grading the land.

It started when a faculty report, prepared by Frank Zimmerman, vie principal of the shool, with Vincent Sarnowski and Paul Buonaguro, teachers, urged the establishment of play facilities near the school. The institution's athletic field is a half a mile from the school building.

Everybody thought the faculty suggestion a good one. Students said they would do most of the manual labor and the board of education donated picks and shovels. Anthony Belone, James Rankin and Michael Cipolla, local residents, agreed to supply topsoil and Fred Williams offered the use of his trucks. Township Engineer Patrick J. Grail promised the facilities of his department.

Plans called for facilities for tennis, shuffle-board, track, softball and field and ice hockey. The area was set off with flower gardens and shrubbery.

School officials think the recreation field not only will fill a community need but show the students what democratic cooperation can do.

Colored Dots

G. L. James, Negro Chairman for the annual Red Cross Drive in this county has addressed the following letter of appeal for contribution:

"Dear Friends:

"Now is the time to join in the expression of brotherhood and consideration of the welfare to those who are less fortunate than ourselves.

"We must give in order to receive. We must labor to reap the harvest, love in order to be loved, and be friendly to our neighbor whose friendship we seek. It is a wheel within a wheel, faith and the grace of God.

"The Red Cross is supported by the donations from people like us and our neighbors, The Red Cross stands ready to serve its people in the time of flood, fire, famine and other destitute conditions that man continually finds himself in.

"As chairman of the drive for our race, I am asking YOU to carry this message before your church and Sunday School, taking just a few moments for contributions.

Respectfully,
G. L. James."

Note: The Red Cross has set a goal of March 15 for all reports to be in.

Sunday guests of Mr. and Mrs. Hobert Watson were Mr. and Mrs. Lewis Jennings, of Appomattox; Prof. and Mrs. J. A. Baker, of Halifax, Va.; Mrs. Hannah Brown, of Greensville, N. C.; Mrs. Pearl Baker and Joseph Burton, of Farmville, Va.

Rabbits in Atom Research

A pair of English lop-eared rabbits is the newest addition to the animal collection of the Atomic Energy project of the University of California at Los Angeles. The rabbits get their name from their large (eight inches long) floppy ears, which have a minimum of cartilage and which the rabbits are unable to raise. The structure and size of the ears make them valuable for general cardiovascular (blood vessels and heart) research. The Atomic Energy project will use the animals specifically for studying the effect of radiation on capillaries, which are readily observable in the rabbits' large ears.

Beverly Hills

Beverly Hills, March 7.- Mrs. Whitcomb Wells, who suffered a heart attack this week has been visited by all of her family and many friends.

Mrs. Malcolm Booker motored to Richmond Wednesday to carry Mr. and Mrs. John R. Booker for a visit with Mrs. Sue B Christian. Mr. Booker will enter Medical College Hospital for treatments while there.

Mrs. Geneva Dixon, who has been sick is slowly improving.

Sam Moore and Al Borkley spent last Sunday visiting Mr. and Mrs. Sam Gunter, in Roanoke.

Mr. and Mrs. Jimmy Mustain, Richmond were the week-end guests of Mrs. Kirk Mcginson.

Several from this neighborhood attended an old-fashioned square dance at Buckingham on Saturday night. The Turner Band furnished the music. A nice time was had by all.

Mr. and Mrs. Allen Carter and family spent last week-end in Roanoke with her mother, Mrs. Bess Ferguson, and sister, Mrs. Sam Furr.
